

# Solar Yard Lights Specification

## Product Details:

|                     |                               |   |
|---------------------|-------------------------------|---|
| Solar Panel         | Max Power                     | 1.6W 5.5V (17% High Efficiency Solar Panel) |
|                     | Lifetime                      | 25 Years                                    |
| Battery             | Type                          | Lithium Battery 3.7v 2000mAh                |
|                     | Lifetime                      | 5 Years                                     |
| LED                 | Max Power                     | 3.7V 1W                                     |
|                     | Lumens                        | 100 Lumens                                  |
|                     | Lifetime                      | 50000 Hours                                 |
|                     | Viewing Angle                 | 360°  |
| Charging Time       | 7~8 Hours By Bright Sun Light |   |
| Discharging Time    | Over 2 Nights                 |   |
| Working Temperature | -25°C to 65°C                 |   |
| Color Temperature   | 6000K                         |   |
| Lamp Material       | Aluminum + ABS                |   |
| Certificate         | CE / ROHS /FCC / IP65         |   |
| Waterproof          | IP65                          |   |
| Warranty            | 12 Months                     |   |

## Practical Application:
