

GPS synch roadsigns system

Uncontrolled and mid-block crossings have higher rates of driver-pedestrian conflicts. Standard crosswalk signs have not proven to be effective at some of these crossings. MACSUN SOLAR offers **GPS synch roadsigns system**/solar road stud that commands a driver's attention for a higher yielding compliance rate in both day and night.

GPS synch roadsigns system provides real-time warning that pedestrians are using the crosswalk system. They can be activated by various options using solar power and wireless technology, offering you low costs of installation, operation and maintenance.

MACSUN SOLAR smart activation options:

Optional Blinker Beam
Wireless

Optional Push
Button Activation

Optional Wireless
Bollard Activation

Optional Pedestrian
Motion Detective

Optional GPS
Activation

Let MACSUN SOLAR help in the design of your crossing.

Application:

- Great solution for safe routes to school, mid-block crossings and roundabouts with pedestrian traffic
- Federal funding is available if crossing is on a school route
- Available in all FHWA legends, for signs and plaques
